

UltraSump®

BATTERY BACK-UP PUMPING SYSTEM

If you rely on a sump pump to keep your basement dry, you need a battery back-up pump for

- Power Outages
- Primary Pump Failures
- Circuit Breakers Tripping
- Pump Unplugged

The **UltraSump®** provides you the reliability and peace of mind you're looking for.

ULTRASUMP®

- Back-up pumping system
- State of the art battery back-up system
- Turns on automatically if primary pump fails to run - there is nothing you have to do
- Automatic switching system
- Alarm tells you when you are on back-up so you can restore the power on primary pump
- High-capacity 120 amp power pack
- 2,018 gallon/hour output at 8' high
- Will pump 12,000 total gallons out on a new fully charged power pack

With an **UltraSump** in your home, when

- The power goes out, *you have a second power source*
- The primary pump fails, *you have a second pump*
- The primary pump switch fails, *you have a second pump switch*

The UltraSump is a professional system; its performance, design and reliability far exceeds other models.

The UltraSump is available with an optional double power pack configuration (shown) to double the total gallons it can pump out. Ask your dealer for more information.
