

ZenWall™

BASEMENT PANELING SYSTEM

ZenWall™ makes your basement walls look “almost finished” for a fraction of the cost of finishing your basement. Your basement walls will be dry, warmer, cleaner, and brighter.

**Basement
Systems**
Basement Environment Specialists®

The simplest way to create a dry, clean, finished look on your basement walls!

- ¼" thick encapsulated fiberglass core with a reflective foil vapor barrier on the back side and a decorative vinyl finish on the front side
- Made entirely of inorganic materials that will not rot or support mold growth
- Comes in 2½ foot by 8 or 9 foot panels
- Used with a perimeter basement waterproofing system to waterproof a basement wall, and stop water vapor from coming through the wall into the basement air
- Enhances look of the basement for a fraction of the price of full basement finishing
- Insulating & washable

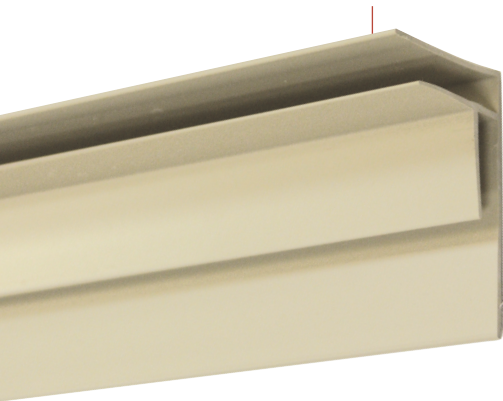

VINYL FINISH

FOIL VAPOR BARRIER

1/4" FIBERGLASS CORE

INNOVATIVE TRIM

allows fasteners to be hidden

ZenWall™ can make up to a 10 degree difference in the surface temperature of the wall-adding comfort and saving energy. **ZenWall™** looks great!

DRILLED-IN FASTENERS

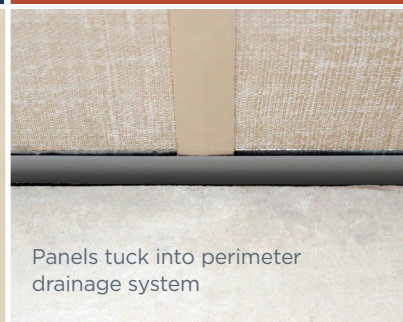

Panels can never come off the wall

EASILY TRIMMED PANELS

WORKS WITH WATERGUARD

Panels tuck into perimeter drainage system
